Skills

Strong (HTML, CSS, JavaScript(ES6), React.js, PostgreSQL, Node.js, Express.js,)

Tools (Figma, Lodash, GitHub, Bootstrap CSS, Chart.js, Argon2, AWS-S3, Babel, Webpack,)

Project Management (Stage-by-stage planning, team management, multi-team cooperation, large scale event planning, managing deadlines and work schedules)

Projects

Looking To Play 🔗

Solo full-stack web app to connect CS:GO players with reliable teammates

- Built using React, Node.js, Express, PostgreSQL
- Initial design produced using Figma Bootstrap UI
- Self-designed database and express API used in data manipulation
- Implementation of Argon2 encryption features to create secure logins and user experience
- Use of Chart.js library to include unique user breakdown displayed by user regions

Pegasus Deck Builder 🔗

Solo developed front-end web app to build and price unique card decks

- Designed wireframe using Figma tools to reduce amount of restructuring of design in code
- Populated data required for card searches from YGO Pro's public API using jQuery AJAX method
- Utilized local storage data model to save API requests and use it diversely across multiple phases of development and user interaction.
